🔐 GitHub Push Instructions

Your code is ready to be pushed to GitHub! However, authentication is required.

Current Status

✅ Git repository initialized
✅ Remote added: https://github.com/aldopredator/WEB.portfolio-intelligence.git
✅ Changes committed locally
⏳ Ready to push (authentication needed)

Option 1: Use Personal Access Token (Recommended)

Step 1: Create a GitHub Personal Access Token

1. Go to GitHub Settings: https://github.com/settings/tokens
2. Click "Generate new token" → "Generate new token (classic)"
3. Give it a name: "Stock Dashboard Deploy"
4. Select scopes:
   - ✅ **repo** (full control of private repositories)
5. Click "Generate token"
6. **Copy the token immediately** (you won't be able to see it again!)

Step 2: Push with Token

Run this command (replace `YOUR_TOKEN` with your actual token):

```
cd /home/ubuntu/stock_insights_dashboard/nextjs_space
git push https://YOUR_TOKEN@github.com/aldopredator/WEB.portfolio-intelligence.git main
```

Example:

```
git push https://ghp_1234567890abcdefghijklmnopqrstuvwxyz@github.com/aldopredator/WEB.portfolio-intelligence.git main
```

Option 2: Use SSH (If you have SSH keys set up)

Update Remote to SSH URL

```
cd /home/ubuntu/stock_insights_dashboard/nextjs_space
git remote set-url origin git@github.com:aldopredator/WEB.portfolio-intelligence.git
git push -u origin main
```

Option 3: Download and Push from Local Machine

Step 1: Download the code

Download all files from `/home/ubuntu/stock_insights_dashboard/nextjs_space/`

Step 2: Push from your local machine

```
cd path/to/downloaded/files
git init
git add -A
git commit -m "Initial commit: Stock insights dashboard"
git remote add origin https://github.com/aldopredator/WEB.portfolio-intelligence.git
git branch -M main
git push -u origin main
```

(You'll be prompted for your GitHub username and password/token)

Quick Command Reference

All your code is ready in this directory:

```
/home/ubuntu/stock_insights_dashboard/nextjs_space/
```

Current git status:

```
cd /home/ubuntu/stock_insights_dashboard/nextjs_space
git status        # Check current status
git log           # View commit history
git remote -v     # View configured remotes
```

What's Included in the Repository

✅ Complete Next.js 14 application
✅ All React components (price-card, analyst-card, etc.)
✅ TypeScript types and utilities
✅ Tailwind CSS configuration
✅ Stock data JSON file
✅ README.md with full documentation
✅ .gitignore (excludes node_modules, .next, etc.)

After Successful Push

Once pushed, your repository will be visible at:
https://github.com/aldopredator/WEB.portfolio-intelligence

You can then:
- Clone it to any machine
- Share it with others
- Deploy to Vercel/Netlify
- Set up CI/CD pipelines
- Enable GitHub Actions

Need Help?

If you encounter issues:
1. Check your GitHub permissions
2. Verify the repository exists and you have write access
3. Make sure your token has the correct scopes
4. Try creating a new Personal Access Token

Note: Never commit your Personal Access Token to the repository!
